ENGLISH

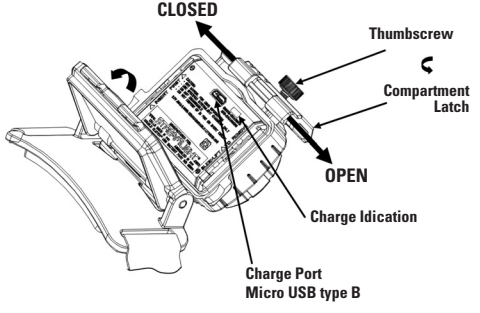
Congratulations on the purchase of the **Double Clutch USB Headlamp.** Proper care and use of this product will provide years of dependable service.

Flashlight must be fully charged before first use.

USB BATTERY CHARGING

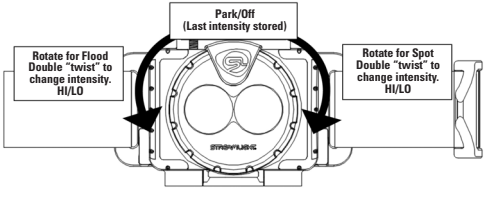
- Loosen thumbscrew, slide latch and open battery compartment.
- Place the connector from the USB cable into the charge port and allow the flashlight to fully charge. An LED located next to the port lights red for charging and green for ready.
- Remove USB cable after green LED lights.
- Close compartment, slide latch, and tighten thumbscrew.

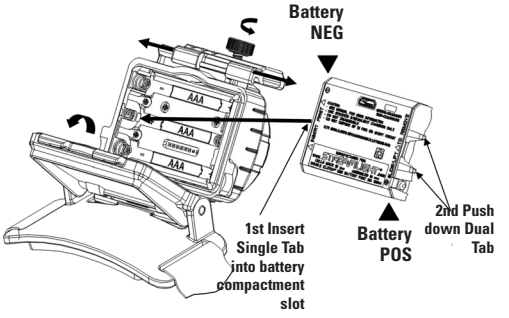
Note: Rechargeable battery may be charged in or outside of the light.



OPERATING INSTRUCTIONS

The Double Clutch is operated by rotating the outer grip ring of the multi lens facecap. Rotating grip ring in either direction selects flood or spot and varying levels of output. Change intensity by slightly rotating the facecap until the light briefly turns off and then on again.





DOUBLE CLUTCH BATTERY REPLACEMENT

Uses rechargeable lithium polymer battery. Also accepts three AAA alkaline or lithium batteries.

- Loosen thumbscrew, slide latch and open battery compartment.
- Slide and lift rechargeable battery for removal or remove depleted AAA cells. (Rechargeable battery may be charged in or outside of the light).
- Insert rechargeable battery marked "INSERT FIRST" into compartment. Ensure battery properly locks into compartment. If using AAA cells insert them as shown on diagram inside the battery compartment.
- Close compartment, slide latch, and tighten thumbscrew.

Recycle worn out or damaged batteries properly. Do not attempt to incinerate the battery as it may explode in a fire.

MAINTENANCE AND SERVICE

Periodically inspect housing, lens, and seal for any damage or excessive wear that could affect ingress (IP) protection. Clean only with a clean, damp cloth and mild detergent.
