

VANTAGE®

HELMET-MOUNTED LIGHT

Fits snugly against the helmet both below and above the brim

Blue taillight ensures visibility from behind

Features reflective strip on LED housing

Available Colors:

Compact and low-profile, the Vantage® helmet light is built for firefighting and industrial use, mounting securely above or below full-brim helmets. Its clamp allows fast, tool-free battery changes when installed under the brim, and an ambidextrous tail switch ensures reliable activation even with bulky gloves. A high-candela LED delivers a focused beam that cuts through smoke and haze without washing out peripheral vision, improving awareness in low-visibility conditions. An ultra-bright blue taillight enhances personnel visibility, while the sealed, water-resistant build ensures dependable performance in harsh environments.

OUTPUT

LUMENS	225
CANDELA	22,000
DISTANCE	297m
RUN TIME	5 hrs
